

1. USE

Cat. 6A cables with 4 twisted pairs, 100 ohms very high speed, for horizontal floor or backbone distribution. This cables enable the use of protocols supported by Class EA for 10G Base-T applications. It is characterised up to 500 MHz

802.3 bt PoE++ up to type 4 applications compatible according to installation standards ISO/IEC 14763-2 : 2019 and EN 50174-2 : 2018

1.1 Particularities

- U/UTP cable with a discontinuous strip section, cut every 15cm ensuring no shielding continuity. This strap allows a reduced external diameter of the cable compared to the solutions usually proposed in Cat 6A U/UTP; serves as protection against external disturbances (Aliencrosstalk) and above all makes it possible to reach a high EUROCLASS level within the framework of the RPC: Cca - s1a d1 a1

- Cable to be connected to UTP sockets
- For optimum use, cut the strip flush with the sheath.
